

42-cis-diamineplatinum (II) dichloride (cisplatin) (CAS# 15663-27-1)														
Table 1a. Sub-lethal acute poisoning (single dose): Clinical observations (time related)														
Ref No.	Reference (linked to full source)	Case No.	Case age/sex	Case category	Dose: g	Notes (case, dose, time)	Time (exposure to sampling): h	Notes (blood sample)	Blood conc.: mg/l	Blood conc.: µM	Metabolite Blood conc.: mg/l	Metabolite Blood conc.: µM	Symptoms and signs	Treatment
1	Chu 1993	1	68F	U	0.48	(a), ET	312		2.6	13.3			24h:MS, V, IP; 96h:(b) 168h:SZ	
Footnotes [General Glossary (via link) lists definitions of common abbreviations (general terms, symptoms and signs, treatment)]														
MW cisplatin = 300														
MW platinum = 195														
(a) received cisplatin instead of carboplatin; also usual dose of 1500 mg of cyclophosphamide.														
(b) total deafness.														
(c) a patient continued to have profound deafness, hypertension, anemia, and renal failure requiring dialysis.														
Table 1b. Sub-lethal acute poisoning (single dose): Clinical observations (without time information)														
Ref No.	Reference (linked to full source)	Case No.	Case age/sex	Case category	Dose: g	Notes (case, dose, time)	Time (exposure to sampling): h	Notes (blood sample)	Blood conc.: mg/l	Blood conc.: µM	Metabolite Blood conc.: mg/l	Metabolite Blood conc.: µM	Symptoms and signs	Treatment
no cases														
Footnotes [General Glossary (via link) lists definitions of common abbreviations (general terms, symptoms and signs, treatment)]														
MW cisplatin = 300														
MW platinum = 195														

cisplatin

<b>Time (exposure to recovery): h</b>
696, (c)
<b>Time (exposure to recovery): h</b>

MW cisplatin = 300														
MW platinum = 195														
(a) a reccurent lymphoma; accidental administration of 0.75 g cisplatin instead of 0.17 g. Same patient as in Table 3b: Post-mortem observations (without time information).														
(b) at the end of perfusion; blood concentrations of cisplatin.														
(c) just before renal dialysis.														
(d) completelly deaf.														
(e) completelly blind.														
(f) N-acetylcystein administered as adjuvant therapy.														

cisplatin

Time (exposure to death): h
384
